Microsoft Confidential | Powered by Microsoft® Office SharePoint® Server 2007 | Privacy Statement

- 1 The dark gray items in the left nav (repeated along the top as tabs) are the neighborhoods on MSWeb. Each is its own site. The labels and categories are not final, yet.
- 2 The generic modules listed here should rotate among
  - Breakfast Series
  - In the Know
  - Productivity Tip
  - Promo
  - Poll

Sections should be included and ordered on the page as desired each day. Optionally, the repeating elements could each use their own particular visual style for the header, rather than the standard section header bar and text.
- 3 The purpose of the right rail here is to hold content that isn't quite the featured, timely content in the center section, but is more persistent and can be very useful. I'd recommend keeping
  - TopSites around Microsoft
  - Popular Search Terms (if technically feasible)
  - Map Lookup (provides a prominent entry for a common feature. You may choose to vary which map is shown in the thumbnail/link.)

### Executive Post Event Notes

Our current page layouts for things like Town Hall, Street Talk and other executive events are very simple and effective in terms of getting people the basics (description, link to live or on demand video with media player pop-up, contextual or related info, and an add to outlook option).

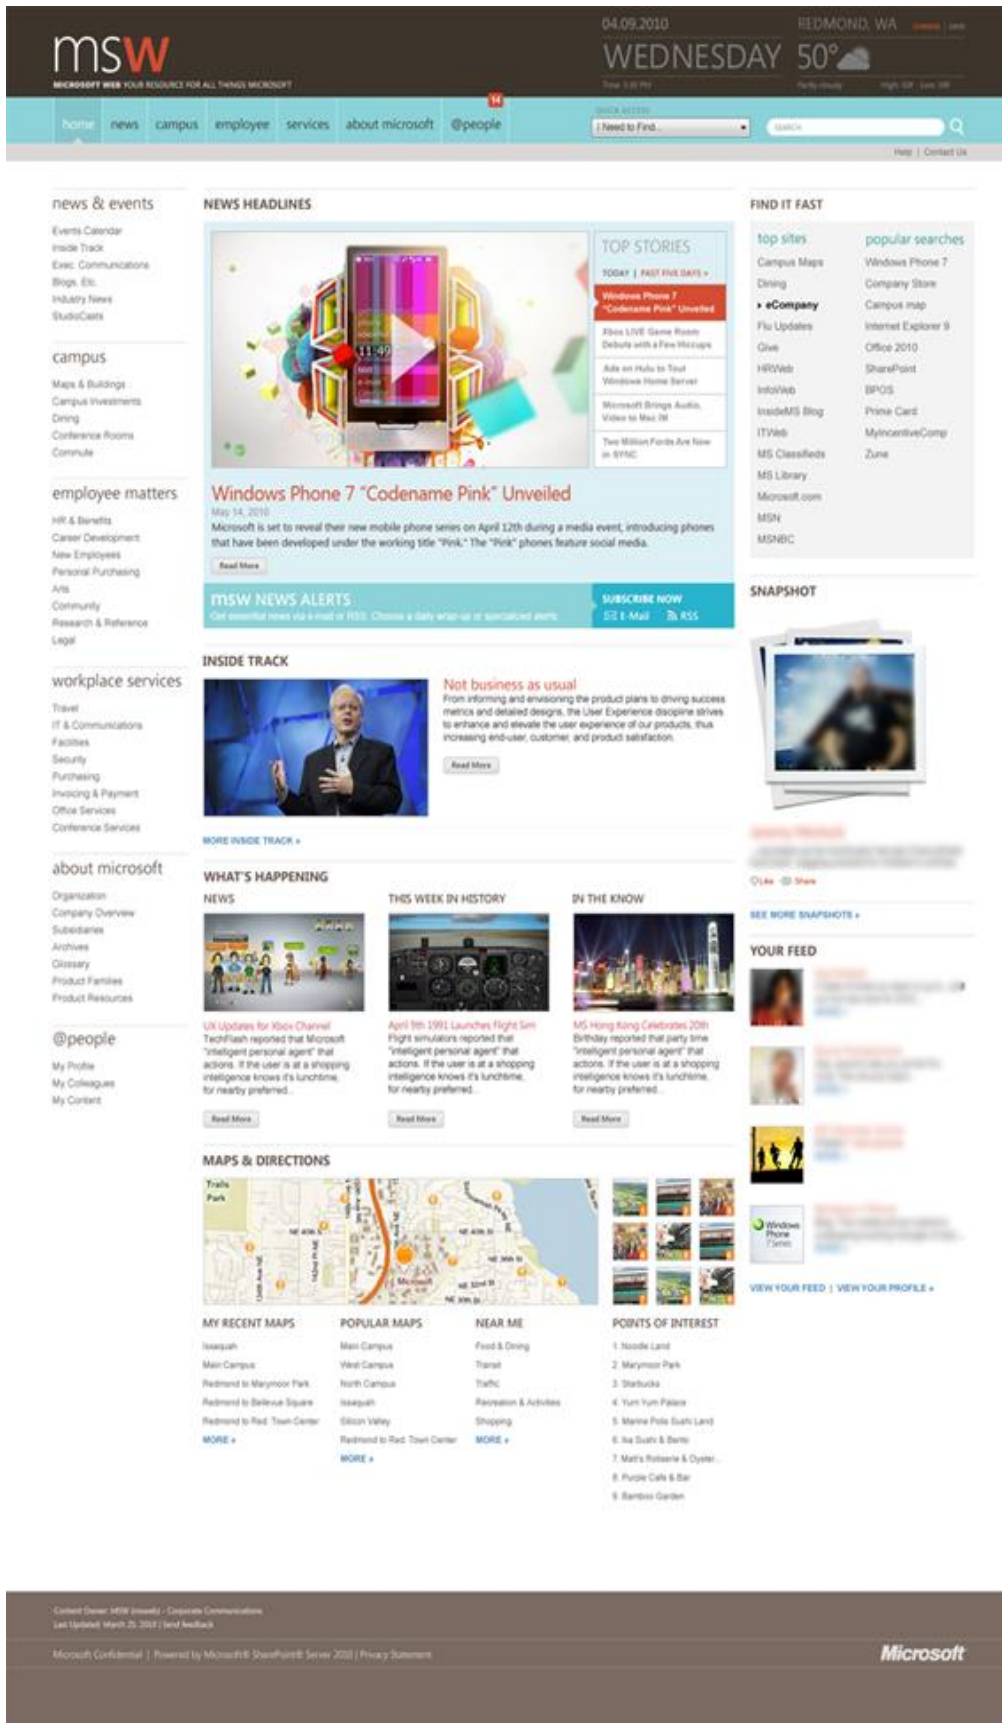

We'd like to see these pages come alive with:

- Embedded video
- Commenting
- Ability to submit and then vote on questions
- Photos (perhaps users could submit photos from the event)
- The basics – date/time/

\* Signifies and element that can be displayed vertically or horizontally.

Portals can connect your employees to business critical information, expertise, and applications.

As an Enterprise Portal, the SharePoint Portals makes it easy for you to meet every aspect of your business needs by providing you with a customized team to guide you with customized solutions and implementation. It can act as a point of contact for best practices to ensure performance.

Portals can provide you hosting environments for your customized solutions.

By engaging the MSIT team, you are provided with customized solution development at a significantly reduced development cost, and a structured streamlined process for support, deployment, and improvements in the Custom SharePoint hosting service.
